

Devyansh Singh

Software Engineer | Quantitative Trading Enthusiast | 5* CodeChef
devyansh.singh2905@gmail.com • +91 99713 79059 • LinkedIn • GitHub

EDUCATION

KIIT University

B.Tech in Computer Science Engineering
GPA: 8.4 / 10

2018 – 2022

DPS Noida

PCMS with Computer Science
Percentage: 88 / 100

2004 – 2018

HONORS & ACHIEVEMENTS

- CodeChef June Long Challenge 2022 – Global Rank 1 / 15,000+
- CodeChef Starters 42 – Global Rank 18 / 12,000+
- Google HashCode 2020 – Global Rank 5
- Built quantitative trading simulations and backtesting engines using Python and C++
- Researched alpha generation, market microstructure, and statistical signal models

TECHNICAL SKILLS

- **Programming:** C++, Python, JavaScript, Java, SQL
- **Quantitative Finance:** Backtesting, Alpha Research, Market Making, Statistical Arbitrage
- **Trading Concepts:** Tick Data Analysis, Sharpe Ratio, Risk Management
- **Libraries:** Pandas, NumPy, SciPy
- **Frontend:** React, Angular
- **DevOps/Cloud:** Docker, Kubernetes, Jenkins, AWS, Azure
- **Databases:** MongoDB, Redis, SQL Server, DynamoDB

QUANT PROJECTS

Quantitative Trading Research Engine

- Built Python/C++ backtesting framework for short holding period strategies
- Simulated alpha-seeking and market-making strategies on historical datasets
- Evaluated strategy performance using Sharpe ratio, draw-down, and PnL metrics

Market Data Analytics

- Performed statistical analysis on market datasets using Pandas and NumPy
- Developed predictive models for intraday price movement analysis

CERTIFICATIONS

- HackerRank: SQL, Problem Solving
- Coursera: Data Science in Python
- Google Cloud Security Engineer

LANGUAGES

English, Hindi

PROFESSIONAL EXPERIENCE

Software Engineer – Videonetics

Bengaluru, India

2023 – 2026 May

- Designed and developed CI/CD infrastructure for VMS and TMS platforms from scratch
- Architected scalable CI/CD pipelines for VSaaS cloud platform
- Built multithreaded Java Swing automation tools for patch management
- Integrated SonarQube and ESLint for automated static analysis
- Automated release packaging reducing manual effort by 90%
- Developed analytics validation scripts improving data reliability

Associate Software Engineer – SLB

Pune, India

2022 – 2023

- Developed React + Redux modules for enterprise applications
- Built high-performance C++ data-processing components
- Integrated REST APIs increasing throughput by 30%
- Migrated legacy systems to Docker and Jenkins pipelines
- Developed low-code applications using Microsoft Power Platform

Software Engineering Intern – Osmosys

Hyderabad, India

2021 – 2022

- Developed JavaScript web scrapers for large-scale e-commerce platforms
- Improved reliability using dynamic DOM handling and automation workflows

Data Analyst Intern – Xylem Inc.

Bengaluru, India

2021

- Integrated OpenCV webcam feeds into C++ DLL systems
- Applied regression models improving sensor detection accuracy by 20%
